Vue.js	Git
React	Testing library
JavaScript	Next.js
TypeScript	Redux
HTML	Node.js
CSS	

LANGUAGES

Spanish - native language

Portuguese - advanced

English - basic/intermediate, advanced reading

MAYKELL CARRILLO

Front-end Developer

I am a web developer, mainly focused on the Front-end side with React and some of the React based frameworks. I like to keep myself constantly learning new technologies especially when there are challenges that push me to gain new knowledge and improve as a person or as a professional.

EXPERIENCE

Front-end Developer - TARIC

November 2021 - Current

Maintenance, correction and implementation of new features on the platform with Vue.js. One of the notable challenges I have had has been to learn a technology from scratch (Vue.js) to be able to integrate myself into the stack managed in the company.

Front-end Developer - EDteam

December 2020 - November 2021

Maintenance, correction and implementation of new features on the platform with Next.js (React). One of the notable challenges that I have had has been to separate and refactor (from scratch) the entire public web of the platform in a separate project, going from class components to functional ones and migrating from javascript to typescript in the process with remarkable performance results.

Web Developer - Freelancer

February 2020 - September 2020

During this period I accepted some simple freelance jobs to develop them.

EDUCATION

Universidad Gran Mariscal de Ayacucho

Computer engineering (2017-2019)

LEARNING

React.js / React Native com TypeScript - Fernando Herrera

React Hooks, functional components, Context - Juan Pablo de la Torre

JavaScript Moderno (ES6) - Juan Pablo de la Torre

Next.js - Beto Quiroga

OTHERS SKILLS

Asana/Jira - Productivity and teamwork.

Scrum - Ability to work on a goal-based approach with Scrum

Notion - Flow Documentation, requirements, and proposals with Notion.
